E2PM PARTICIPATES IN MENTOR-PROTEGE PROGRAM

E2PM and JMJ Environmental Consulting, LLC have teamed under the Veterans Administration's Mentor-Protege Program. The Mentor Protégé Program (MPP) provides developmental assistance to Service Disabled Veteran Owned Small Businesses (SDVOSB) and Veteran Owned Small Businesses (VOSB). The assistance enhances these businesses' capabilities to perform as prime contractors and preferred subcontractors on VA procurements. Under the VA MPP, protégé firms must be Service Disabled Veteran Owned Small Business or Veteran Owned Small Business.

JMJ Environmental Consulting

WE CAN MAKE A WORLD OF DIFFERENCE

JMJ Environmental Consulting, LLC is an Environmental Engineering and Consulting firm that specializes in soil and groundwater remediation and also conducts environmental site assessments (Phase I's), site mitigation (Phase II's), UST removal, soil and groundwater delineation, asbestos survey, building demolition, soil removal, waste characterization, and property assessments.

Mr. James C. Eicher, JMJ's Founder, is a wounded Veteran who served his country abroad. His decision making skills and ability to succeed under pressure were honed during his service. His commitment to his Clients, his Country, and the experiences he had to overcome have made him who he is today.

INDIVIDUAL SUBSURFACE SEWAGE DISPOSAL SYSTEM SERVICES

E2PM's professionals have over 30 years of experience providing services related to septic disposal systems serving single-family homes as well as commercial facilities. We coordinate the initial planning of the septic placement, prepare the system design, and oversee the construction by working directly with the property owner, system installer, and regulatory personnel. Initial soil evaluations, including soil logs, permeability testing, and groundwater evaluations are performed by our in-house geologists in accordance with State and Local regulations. Our system designs utilize the latest in treatment and effluent disposal technologies, presented clearly for regulatory review and for construction.

Our design services also include:

- New Jersey Pollutant Discharge Elimination System (NJPDDES) permitting.
- Treatment Works Approval (TWA) permitting.
- Freshwater Wetlands General Permit #25.
- Attendance at local Board of Health meetings to provide expert testimony.

INSURANCE SERVICES NEWS

E2PM's Insurance Services sector is pleased to announce that it has received its first claim assignments from Aspen Insurance's Environmental Claims group. With the continued growth of Aspen's Environmental Liability book of business, E2PM looks forward to assisting Aspen's Environmental Claims staff in meeting their environmental claim technical evaluation services needs.

EMPLOYEE NEWS

Congratulations to Tricia Fragale, LSRP for recently passing the LSRP exam!

Ms. Fragale has over 18 years' experience providing environmental consulting services to a wide variety of clients. Her work includes projects for both public and private sector clients including, Preliminary Assessments, Phase I Environmental Site Assessments, Site Investigations, Remedial Investigations and Remedial Action activities. Project types include, but are not limited to, property transactions, Industrial Site Recovery Act (ISRA) compliance, Brownfields inventories and redevelopment, government funded programs, LSRP oversight projects, storage tank removals, site investigations, remedial investigations, etc. Ms.

Fragale's experience has allowed her to develop excellent project management skills including reporting, budgeting, client management, communication with regulatory agencies, file reviews, historic research, field work, marketing, etc. Ms. Fragale serves as the sector manager for E2PM's Environmental & Brownfield Sector. Ms. Fragale has also served as the in-house due diligence manager for an large auto and equipment rental company, facilitating due diligence investigations throughout the United States and Canada and continues to provide services on an as-needed basis. Ms. Fragale has been active with the Roxbury Environmental Commission for over 10 years, and served on the Roxbury Township Planning Board for three (3) years.

Congratulations to Marianne Brody, LSRP for recently passing the LSRP

exam! Ms. Brody has over 12 years of environmental consulting experience dealing with an array of clients. She has managed several sites under the Licensed Site Remediation Professional (LSRP) Program and has obtained her LSRP license. Her experience includes, but is not limited to, site remediation, site investigation, regulated and non-regulated Underground Storage Tank (UST) closure, remedial investigation and remedial actions. She has managed numerous cases that received case closure from the New Jersey Department of Environmental Protection (NJDEP), New York State Department of Environmental Conservation (NYSDEC) as well as the Connecticut Department of Energy and Environmental Protection (CTDEEP). In addition to ensuring regulatory and technical compliancy, she also has field experience in oversight of UST removals, monitoring well installations, site remediation activities, as well as groundwater and soil sampling.

E2PM welcomes Mark Patalive, PG to the team! Mr. Patalive has over 30 years of experience in Civil Engineering specializing in all aspects of septic disposal system design and development in both residential and commercial projects. He is a recognized expert in the field of on-site septic disposal system design. He is particularly skilled at identifying client goals and managing expectations to ensure on-time, and on-budget projects that result in high customer satisfaction.

E2PM welcomes Autry Akins to the team! Mr. Akins, a Geography/GIS graduate from the University of Southern Mississippi, joins E2PM's Natural Resources group with 4 years of experience in a range of environmental services. Services include wetlands delineations, mitigation, and associated permitting, Phase I Environmental Site Assessments, cultural resources surveys, threatened & endangered (T&E) species surveys, environmental assessments and impact studies, as well as Prescribed Wildfires for Pineland ecosystems. His previous experience also includes state and federal regulatory duties for wetland permitting and mitigation bank activities.
